LEARNING SUPPORT

Aiming for Independence

Whatever your needs, the Inclusion Team is here to help

We offer a wide range of personalised support to ensure you can fully access the college and your course. We will help you to find the strategies that work for you during your time at college and in your future career.

TRANSITION SUPPORT

We understand that coming to college can be a new challenge for some learners. Our Transition Co-Ordinators will work with you to put together the transition support programme you need. This may include meeting with you at school reviews, arranging personalised visits to college and supporting you at interview to ensure everything is in place from your first day with us.

ON COURSE SUPPORT

Our dedicated team of Learning Facilitators will work with you to design a personalised support package. We also work with partner agencies to ensure you can access the help you need. This could include any of the following:

- In class support
- Out of class support
- Study skills support
- Modified materials
- Communication support
- Dyslexia support
- Support from Sensory Support / SALT specialists
- Exams Access Arrangements

ASSISTIVE TECHNOLOGY

At college, we embrace the opportunities that technology can bring to your studies and encourage you to use it wherever possible. The college has a range of assistive software available for all students. We can also lend you equipment such as laptops and digital voice recorders, or even better, show you how to make the most of your own kit.
